## CLEAN-FLO INTERNATIONAL

827 Lincoln Avenue, Suite 1

West Chester, PA 19380

FAX: 610-431-1959

---

December 1, 2017

City of Bellingham  
Bellingham, WA

To whom it may concern:

Clean-Flo International designs systems and programs to counteract the effects of nutrient pollution as well as other forms of pollution. One simple principle of our program is complete oxygenation of the water column as well as the pore water of the sediments. We do this with inversion and destratification. The amount of inversion depends on Clean-Flo's engineering design to counteract incoming pollutants and pollutants in a particular body of water. Our program and processes have been implemented around the world in reservoirs, lakes, rivers, wastewater, aquaculture and other applications.

Sincerely,

A handwritten signature in black ink that reads 'Brian Kling'. The signature is written in a cursive, flowing style.

Brian Kling, PE  
President
